

Midea ATOM Series VRF

The Easiest VRF to Install

Applications

- **Perfect for commercial and residential applications**
- **Small offices, villas, apartments, shops, etc.**

Why choose ATOM?

Easy Install

ATOM requires less maintenance and easier to install than mini VRF

Flexible

ATOM is compatible with variety indoor units and control solutions, very flexible for your home application

Future-proof

ATOM uses the DC inverter technology, consume less energy and more efficiently

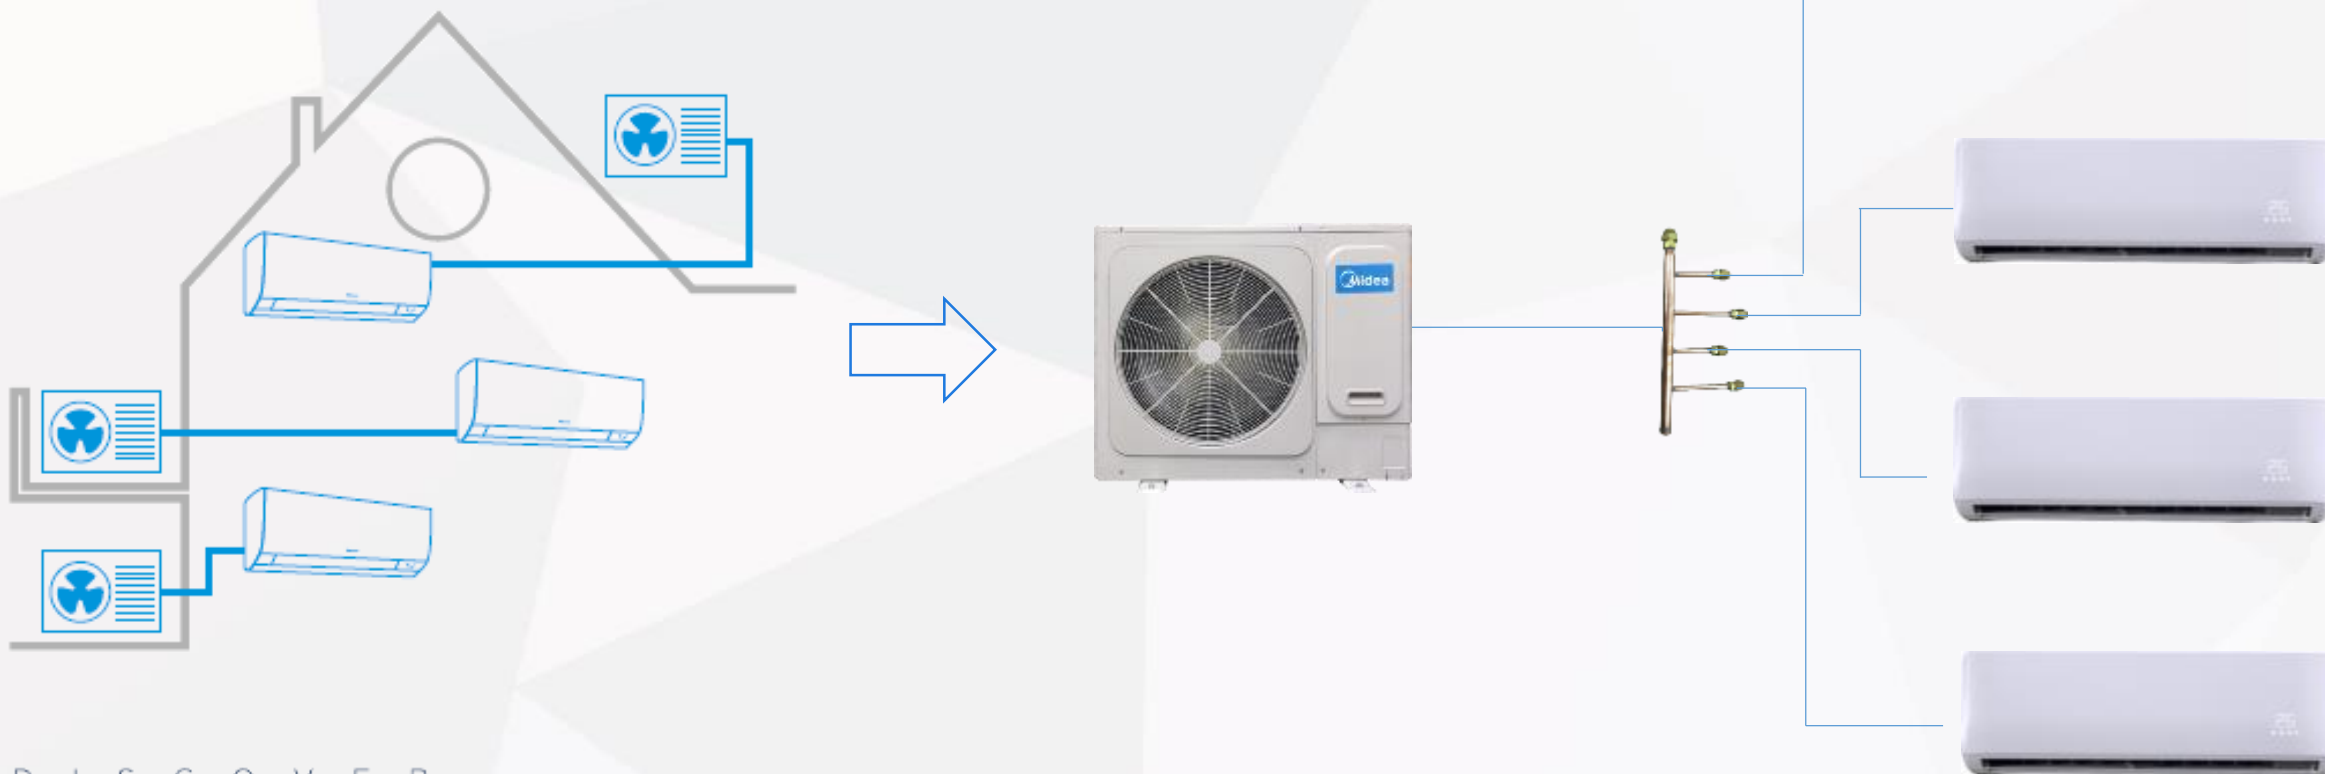

Quiet

ATOM is a perfect multi VRF system that deliver comfortable room environment but quiet and unobtrusive in its normal operation

Easy Installation

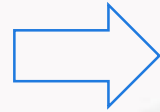

- Only one ODU installed, greatly simplify installation
- The multiple branch header with 1 to 2, 3, 4, 5 or 6 options.

All Screw Connections

- All screw connection between outdoor unit and branch and IDU.
- No brazing required, without fire, safe and fast installation.

Flexible Applications

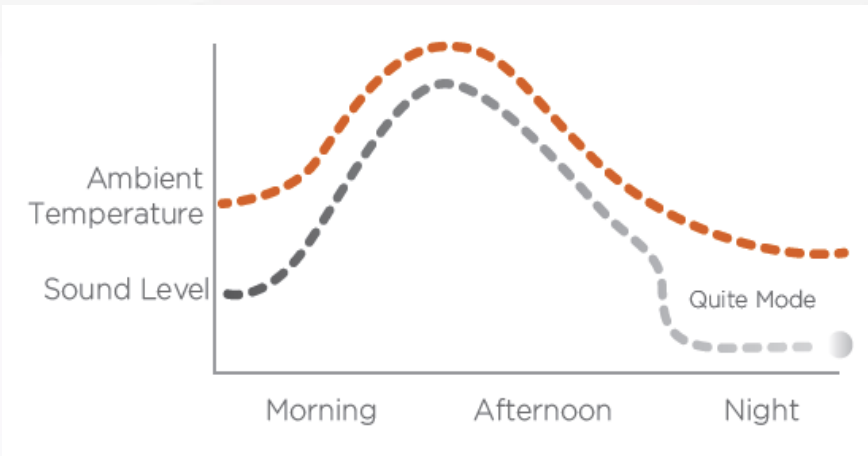

- Variety indoor units connectable
- Multi control solutions optional

Quiet Operation

- Low noise outdoor unit operation thanks to DC inverter technology
- Super quiet indoor unit operation, as low as 21dB(A)

Enhanced Comfort

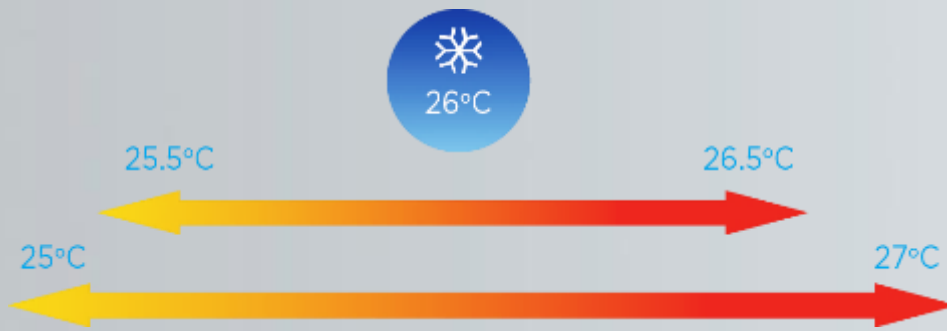

- Fast Cooling & Heating
- $\pm 0.5^\circ\text{C}$ precise temperature control

Benefit : 20% Quicker Heating

Conventional

ATOM

0.5 °C fluctuation to stabilize the room temperature

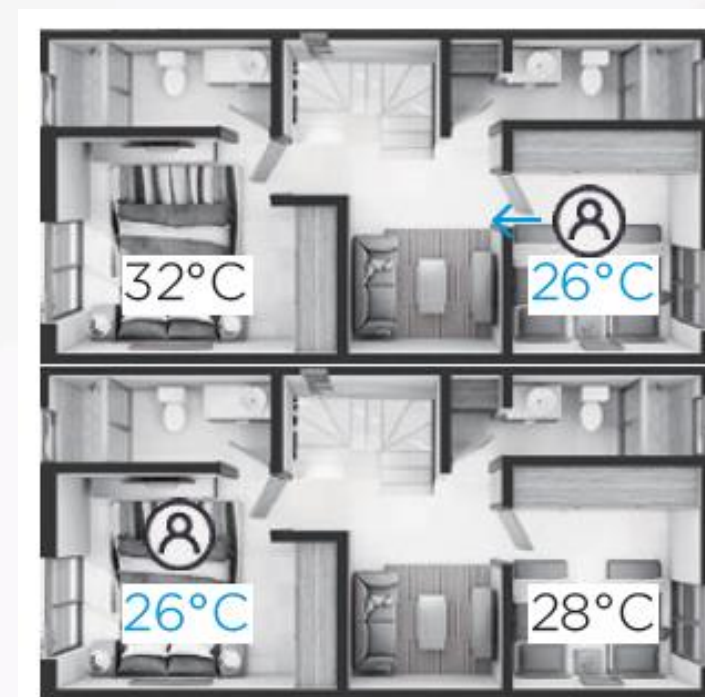

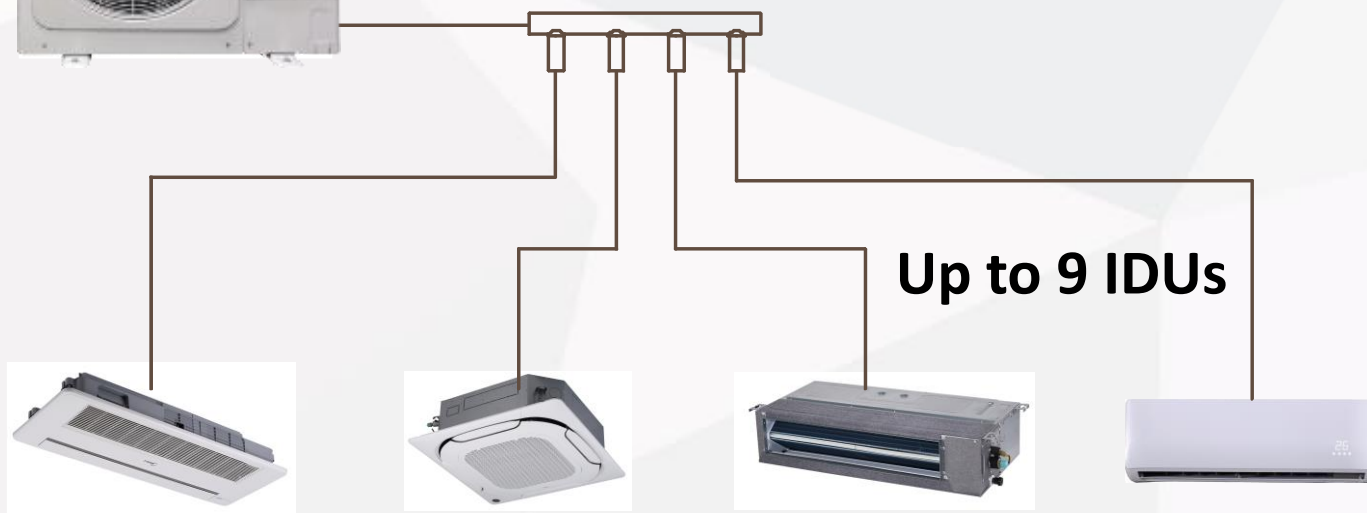

Widely Application

- Wide capacity range
- Multi rooms temperature control

ODU capacity: 28-56kBtu/h
IDU capacity: 5-56kBtu/h
